

## Reptiles

Sixteen reptile species have been classified as endemic to the Albertine Rift with a further three near-endemic. Seven of these are Chameleons and six Skinks. Few snakes are endemic to this region.

Family	Species	Endemic (END) or Near Endemic (NE)
Chamaeleonidae	<i>Bradypodion carpenteri</i>	END
Chamaeleonidae	<i>Bradypodion xenorhinum</i>	END
Chamaeleonidae	<i>Chamaeleo johnstoni</i>	END
Chamaeleonidae	<i>Chamaeleo rudis</i>	END
Chamaeleonidae	<i>Chamaeleo schoutedeni</i>	END
Chamaeleonidae	<i>Bradypodion adolfifridericici</i>	NE
Chamaeleonidae	<i>Chamaeleo ituriensis</i>	NE
Colubridae	<i>Lycodonmorphus bicolor</i>	END
Colubridae	<i>Philothamnus ruandae</i>	END
Gekkonidae	<i>Cnemaspis quattuorseriata</i>	NE
Lacertidae	<i>Adolfus vauereselli</i>	END
Scincidae	<i>Leptosiaphos blochmanni</i>	END
Scincidae	<i>Leptosiaphos graueri</i>	END
Scincidae	<i>Leptosiaphos hackarsi</i>	END
Scincidae	<i>Leptosiaphos luberoensis</i>	END
Scincidae	<i>Leptosiaphos meleagris</i>	END
Scincidae	<i>Leptosiaphos rhodurus</i>	END
Typhlopidae	<i>Leptotyphlops latirostris</i>	END
Viperidae	<i>Atheris nitschei</i>	END
